Comments

(Set forth by above question #, if applicable.
Use "Additional Comments" Sheet, if needed)

File #: 95-300078

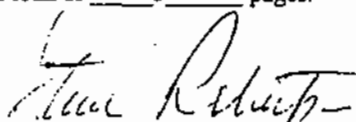

#1. It cannot be determined from reading the notes if the hair comparison was performed in a scientifically acceptable manner. There were no written protocols for hair comparison at the time of the examination.

#2. The results are not adequately documented in the notes. The notes are not dated and are in pencil instead of ink. A confirmation sheet is present in the file. Apparently, this sheet was used to document that a second hair examiner has examined the hair and agrees with the first examiner. However, the results of the second examiner are not documented.
